## 1 Introduction

The concurrent video analytic sample application “video\_e2e\_sample” leverages open source Intel® OneVPL for video codec support, OpenVINO™ for inference support. Both workloads will be accelerated by Intel® integrated Graphics. Meanwhile FFmpeg is used for RTSP streaming in support and OpenCV is for bunding box drawing. Below diagram is the high-level software stack for Linux version.

Please refer to the concurrent video analytic sample application user guide for system requirements, installation instructions, and example command line.

## 2 New in This Release

### New Features

- Support saving inference result to a local file
- Upgrade the Media SDK to OneVPL 22.0.3 and OpenVINO to version 2022.1.

For the example par file of these new features, please refer to the chapter 2 in `concurrent_video_analytic_sample_application_user_guide.pdf`

### 3 Fixed Issues

- N/A

## 4 Known Issues

Reference ID	Description	symptom	Impact	Workaround/Resolution	Affected component/module/driver	Affect ed OS
1	OpenVINO inference doesn't work when remote blob is enabled	Return error.	Application returns error when "-infer::remote_blob" is set in par file	Use newer OpenVINO version than 2022.1 or manually build latest OpenVINO runtime libraries from source code.	Inference	Linux
